ROTATOR CUFF ANATOMY: HOW TO GET IT RIGHT FOR REPORTING

SUNDAY 10TH MAY

5PM (PHILLIPINES)

2.30 PM (INDIA)

FACEBOOK LIVE SESSION

Stressed?

It can get quite confusing working out which rotator cuff tendon is torn. Which makes reporting stressful.

There must be an easy way to do this confidently.

Whats the Answer

Join us on a FB Live session
where we demonstrate

- The MRI anatomy of the rotator cuff tendons.
- The important anatomical structures that will help you get it right for reporting.
- How to make it easy to work out where the tear is when you report.

What Do I Do?

WATCH THESE TWO VIDEOS BEFORE
THE LIVE SESSION (CLICK LINK)

<https://youtu.be/lk9SEAUAzgo>

https://youtu.be/38_GvolWsm4

JOIN OUR LEARN LIVE FB GROUP

ON SUNDAY LOG INTO THE GROUP

Burning Questions?

○ Can Anyone Join?

Currently the Live sessions are only for CTMRISP Fellows– In – Training and Radiology Registrars from Mysore Medical College.

○ How Do I Get the Most from the Session?

Watch the videos BEFORE the live session. (Only 7 minutes... You Can do it)

○ Can I Ask Questions?

YES, YES AND YES. If you dont understand you must ask.

On FB you just need to type in a message so no need to be shy.

○ Any CPD Points with that?

CT–MRISP FTC: 35 points
